

# Bioengineering Research Center

## Research:

- Development of Novel Biomaterials
- Clinical Imaging Devices & Technology
- Multi-scale Computational Modeling
- Nanotechnology

## Funding Sources:

National Institutes of Health  
National Science Foundation  
Kansas Biosciences Authority

## Equipment:

- FTIR and Raman chemical imaging spectroscopies
- Scanning acoustic microscopy
- Thermomechanical property analysis
- Polymer synthesis & reaction kinetics
- Atomic force microscopy
- Access to high resolution scanning and transmission electron microscopy, electron diffraction

### Director:

**Paulette Spencer,  
D.D.S., Ph.D.**

(University of Missouri -Kansas  
City, 1993)

Ackers Distinguished  
Professor, Mechanical Engineering
